

**FCC SELLS 49% OF ITS WATER BUSINESS IN THE CZECH REPUBLIC TO  
MITSUI FOR 97 MILLION EURO**

FCC, THE CITIZEN SERVICES GROUP, CONTINUES WITH THE DIVESTMENT PROCESS TO  
REDUCE DEBT AS SET OUT IN ITS STRATEGIC PLAN

**Madrid, 2 July 2013.** FCC has made further progress towards meeting the objectives in its Strategic Plan. The company has reached an agreement to sell 49% of water company SmVak, in the Czech Republic, to Mitsui for 97 million euro. The transaction includes SmVak's water and infrastructure development activities, conducted through FCC subsidiaries.

SmVak is the fourth-largest water company in the Czech Republic and a market leader in the northeastern region of Moravia-Silesia. It holds a full-cycle water concession for production and distribution of drinking water, discharge and treatment of waste water, and bulk water supply (including operation and maintenance, capital investment and billing and collection). The company has 1.3 million users and owns a 6,000 km supply network. In 2012, SmVak's revenues amounted to around 108 million euro and EBITDA exceeded 42 million euro.

Following the implementation of the Plan, presented by Group Vice-Chairman and CEO Juan Béjar at the end of March, FCC reached an agreement to sell 50% of its stake in Proactiva to Veolia for 150 million euro, and it has also sold its 39% stake in the South West Acute Hospital (Enniskillen, Northern Ireland) for 23 million euro. Other divestments in the period include Hotel Vela, in Barcelona, in which FCC had a stake of 25%, and Autopista del Valle, in Costa Rica, for 13 million euro.
